

Pet Cuisine Product Recall Details and Frequently Asked Questions

Feline Cuisine Product Recall

In line with our commitment to the highest safety standards, we are recalling one batch of Feline Cuisine cat food with the following expiry date, as it may be contaminated with Salmonella and should not be fed to your cat.

Only the below Feline Cuisine pack is affected:

Feline Cuisine Adult Salmon & Rice 4kg EXP: 27/08/2026

We sincerely apologise to affected shoppers. We did not meet our own standards, and we are taking every step necessary to rectify the situation.

Our priority remains the health and wellbeing of consumers and their pets.

Why are we recalling this product?

During routine in-production quality testing, certain batches manufactured during the affected period were isolated to be sent for destruction. Subsequent checks have revealed that this specific batch has been identified in the formal retail sector and as a result we are recalling Feline Cuisine Adult Salmon & Rice 4kg, expiring on 27/08/2026

All other Feline Cuisine products are safe to feed your cat.

What is Salmonella?

Salmonella is a well-recognised food and feed safety pathogen capable of surviving in dry-processing environments, that can cause illness in pets and humans.

If your cat shows any signs of illness after consuming dry cat food, owners should consult their veterinarian promptly. Washing hands thoroughly with soap and water after handling cat food is the most important step in preventing potential transmission to people.

What to do if you have this product:

- Stop feeding it to your cat or any other animals.
- Do not donate or sell it.
- Bag the product
- Wash your hands thoroughly with soap and water after handling it.
- Return the bagged product to the store where you purchased it from for a full refund or replacement.

Please send us a DM or contact our consumer care team should you need further assistance in determining if your product is affected.

Canine Cuisine Product Recall

In line with our commitment to the highest safety standards, we are recalling certain batches of our Canine Cuisine products with the following expiry dates as these products may be contaminated with Salmonella and should not be fed to your dog.

Only the below Canine Cuisine packs are affected:

Canine Cuisine Small - Med Adult Chicken & Rice 1.75kg EXP 15/09/2026
Canine Cuisine Small - Med Adult Chicken & Rice 6kg EXP 15/09/2026
Canine Cuisine Med - Large Adult Chicken & Rice 1.75kg EXP 06/08/2026
Canine Cuisine Med - Large Adult Chicken & Rice 6kg EXP 06/08/2026 & 07/08/2026
Canine Cuisine Med - Large Adult Chicken & Rice 10kg EXP 06/08/2026
Canine Cuisine Gravy Coated Adult 1.5kg EXP 16/09/2026
Canine Cuisine Gravy Coated Adult 5.5kg EXP 16/09/2026

We sincerely apologise to affected shoppers. We did not meet our own standards, and we are taking every step necessary to rectify the situation.

Our priority remains the health and wellbeing of consumers and their pets.

Why are we recalling these products?

Following the recent theft of condemned dry pet food that had been sent to a waste management facility in eastern Gauteng for destruction, and its subsequent resale on the informal market, RCL FOODS initiated spot checks on products at the formal retail sector.

These inspections have revealed that certain batches manufactured during the affected period, which may be contaminated with Salmonella and were designated for destruction, have nonetheless been found in the formal trade. At this stage, we are not aware of any animals or people having been affected.

All other Canine Cuisine products manufactured outside of the listed expiry dates are safe for sale and consumption.

What is Salmonella?

Salmonella is a well-recognised food and feed safety pathogen capable of surviving in dry-processing environments, that can cause illness in dogs and humans.

If your dog shows any signs of illness after consuming dry dog food, dog owners should consult their veterinarian promptly. Washing hands thoroughly with soap and water after handling dog food is the most important step in preventing potential transmission to people.

What to do if you have an affected pack:

- Stop feeding the product to your dog or any other animals.
- Do not donate or sell the product.
- Bag the product

- Wash your hands thoroughly with soap and water after handling the product.
- Return it to the store where you purchased it from for a full refund or replacement.

Questions and Answers: Salmonella Contaminated Pet Food Recall

When did RCL FOODS discover the Salmonella?

In November last year, traces of Salmonella were identified through our routine in-production quality control processes. As part of our FSSC22000 food safety monitoring system, we monitor raw material and finished product. As part of this process, traces of Salmonella was initially detected on a limited number of batches of dry pet food product manufactured at one of our two dry pet food facilities. RCL FOODS also has a wet food plant which, along with the other unaffected dry food plant, continued to produce product to meet demand throughout this period. All plants are thoroughly tested.

All potentially affected products were immediately isolated, and, in line with our food safety protocols, the identified batches were condemned to be sent for destruction at a specialist waste management facility.

Where did the Salmonella come from?

Salmonella is a well-recognised food and feed safety pathogen capable of surviving in dry processing environments, particularly where dust, moisture, or pest activity is present.

The results of our testing suggested environmental contamination rather than a raw material source. This was a contained issue identified through routine monitoring processes.

What steps did you take to get rid of the Salmonella?

Production was paused while the plant was thoroughly cleaned and sanitised by a specialist service provider. At the same time, essential and preventative maintenance was also carried out. A comprehensive, end-to-end deep cleaning and sanitisation programme was undertaken to fully eradicate the contamination. This process is backed by a comprehensive swabbing protocol at each step of the process to determine the effectiveness of the cleaning in each area of the facility.

Operations resumed only after extensive follow-up testing confirmed the facility was free of contamination. Production has since resumed safely under strengthened monitoring measures. Only products with the specified expiry dates are included in the recall. All other products with different expiry dates are safe for sale and consumption.

Why did you recall?

RCL FOODS is issuing a recall of certain dry pet food product lines, manufactured in one of its facilities. This follows the recent theft of condemned dry pet food that had been sent to a waste management facility in eastern Gauteng for destruction, and its subsequent resale on the informal market. RCL FOODS instituted further checks on potentially contaminated product that had been designated for destruction, and regrets to confirm that some of these batches are in the formal trade.

In line with our commitment to the highest safety standards, RCL FOODS is initiating a country-wide recall of limited batches of Bobtail, Bonzo, Catmor, Canine Cuisine, Feline Cuisine, Optimizor and Ultra Pet Dog food manufactured at one of our two pet food plants. In line with our commitment to doing the right thing, we have expanded the product scope beyond the products we initially announced on Sunday 1 March.

RCL FOODS is working closely with retailers, regulators and relevant authorities to identify and remove all affected products from the market.

What are the symptoms of Salmonella to look out for?

Common symptoms in pets include diarrhoea, vomiting, fever, loss of appetite and lethargy.

Common symptoms in humans include diarrhoea, vomiting, fever, stomach cramps, abdominal pain, nausea and headaches.

Young children, the elderly, pregnant woman and people with weakened immune systems are at higher risk of severe illness.

Which products are affected?

- Bobtail
- Bonzo
- Catmor
- Canine Cuisine
- Feline Cuisine
- Optimizor
- Ultra Pet Dog food

How do you ensure this does not happen in future?

Together with independent forensic experts and the relevant authorities, we are urgently investigating to determine how this product entered the market and the associated corrective actions to prevent recurrence.

We are:

- Conducting a full root cause investigation

- Reviewing relevant processes and procedures
- Implementing additional precautionary controls where necessary

We are committed to maintaining the highest safety standards. Operations resumed only after extensive follow-up testing confirmed the facility was free of contamination. Production has since resumed safely under strengthened monitoring measures. Only products with the specified expiry dates are included in the recall. All other products with different expiry dates are safe for sale and consumption.

What should I do if I think I have one of the products affected?

1. Stop feeding your pet the product immediately.
2. Check your bag's expiry date against dates listed on our recall communication.
3. If you have a product listed for recall, return your product to where you bought it, to get a refund.

If shoppers cannot return the product to the stores it was purchased from, it can be safely disposed of with their normal waste. Simply place it in a sealed bag and discard it in the waste bin.

Need further assistance?

For further assistance, consumers can reach out to our Customer Care team via:

- Telephone: 0860 103 764 (24 hours)
- WhatsApp: 087 359 0476
- Email: RCLConsumerCare@rclfoods.com (Business hours)

What are the details of the affected batches?
